

**PRESSURE WASHING SYSTEMS
MANUFACTURER SINCE 1993**

Unimanix

**UNIMANIX INTRODUCES ITS NEW TECHNOLOGY
100% ECOLOGICAL PRESSURE WASHERS**

- HIGH PERFORMANCE
- CUSTOMISED SOLUTIONS
- COMPREHENSIVE ALL ELECTRIC RANGE

PRESSURE WASHER 100% ELECTRIC

You may think a pressure washer is intended for very specific cleaning tasks or not worth investing in? A pressure washer has the power of up to 75 times a garden hose and allows it to break the chemical links of a stubborn stain. Combined with the options of hot water or steam, a pressure washer increases your applications for various cleaning chores. Savings of 60% water consumption and soap means a fast and efficient solution to save the environment.

UNIMANIX innovates in the pressure washer business. Made here in Quebec, its 100% electric models lead in the new technologies. Pressurized water enters directly into the coil passing through electrical heated elements allowing savings up to \$5,000/year in comparison to diesel-heated units.

HERE ARE A FEW BENEFITS:

- Capable of making steam.
- Light and easily transportable.
- No need to install exhaust chimney.
- No smoke, no odor; ideal for indoors.
- Non-polluting, environment-friendly.
- No need for constant fuel refills.
- Low manpower for care and repair.

PRESSURE WASHER 100% ELECTRIC

These 100% electrical units are among the various types of pressure washers from UNIMANIX, a Quebec-based manufacturing business, creators of industrial models for the past 20 years.

UNIMANIX excels in sales and repairs of all types of equipment ranging from 2 to 20 GPM and up to 10,000 PSI.

UNIMANIX is more than a pressure washer manufacturer. It is a team of engineers, sales representative and qualified technicians that can help you customize the equipment to your specific needs. With its manufacturing plant in Dorval and its technicians on the road you are assured of a fast and reliable answer. Same day delivery is available for other regions.

Unimanix

Nothing beats the efficiency of a pressure washer to save time and energy. Try it and benefit from it. *A powerful step towards a cleaner environment...*
